

Orange Business is committed to protect the environment and we acknowledge the potential environmental impact that our operations may have on the environment.

The purpose of the Environmental Policy is to prevent and control potential risks to the environment.

This policy applies to the management, employees and hired consultants in Orange Business.

The business needs are primarily to contribute to the Paris Climate Agreement and in line of that to the Orange Engage 2025 strategy, where we all are dedicated to reducing the CO2 emission with the ambitious target to achieve net zero carbon by 2040.

Our mission is to:

**Reduce our carbon footprint through energy efficiency and the use of renewable energies**

- Internally: by improving the energy efficiency of our offices and data centers, by increasing our amount of renewable energy in our total consumption, by controlling our environmental impacts in our strategic processes, and by encouraging sustainable transportation.
- Externally: by developing solutions that enable our customers to reduce their environmental footprint, by providing them with a calculation of the environmental footprint of our solutions and by promoting green IT offers.

**Limit our global impact on natural resources, promoting a circular economy approach**

- Internally: by reducing our waste, sourcing from responsible suppliers, extending the lifespan of equipment and reusing physical assets whenever possible in all areas (IT, network, office, etc.), and integrating eco-design principles into our IT and technical solutions.
- Externally: by promoting circular economy with our customers, reusing customer assets as much as possible, and supporting our customers' efforts to reduce their own environmental footprint using digital and eco-design.

**Prevent pollution risks, protecting the environment and biodiversity**

- By controlling major environmental risks (pollution prevention) related to our facilities, activities, products, and services. Ensuring our regulatory compliance with all our environmental and energy obligations, requirements and interested parties' expectations.

To minimize the impacts concerning our activities and services, Orange Business' top management is committed to ensure that:

- The Environmental Management System is continually improved to enhance environmental performance
- The consideration of environmental and energy issues is included in the business strategy.
- Employees and associates/hired consultants are provided with the resources and training necessary to conduct their work in accordance with applicable environmental regulations and Orange Business requirements.
- We create and manage workplaces that are eco-efficient and reflect our commitment to caring for our environment.
- We have an open dialogue with our stakeholders on environmental issues.
